# Dr.-Ing. Aurore Fass

Visiting Assistant Professor at Stanford University Research Group Leader at CISPA

⊠ aurore@cs.stanford.edu aurore54f.github.io

#### Bio

Aurore Fass is a Visiting Assistant Professor of Computer Science at Stanford University and a Research Group Leader at CISPA Helmholtz Center for Information Security. Her research broadly focuses on **Web Security & Privacy**, **Web Measurements**, and **Machine Learning**. Specifically, she is interested in detecting malware & vulnerabilities on the Web and collecting data to better understand and improve user security and privacy.

#### Scientific Career

- 2021–2023 Visiting Assistant Professor, Stanford University, U.S.
  - Host: Zakir Durumeric
- 2021–2023 Research Group Leader, CISPA Helmholtz Center for Information Security, Germany.
  - 2021 **Postdoctoral Researcher**, CISPA Helmholtz Center for Information Security, Germany.
- 2017–2021 **Ph.D. Student**, Saarland University & CISPA Helmholtz Center for Information Security, Germany.
  - Ph.D. thesis: Studying JavaScript Security Through Static Analysis
  - Advisors: Michael Backes and Ben Stock

#### Education

2014–2017 **Grande École** (similar to a Master Degree), *TELECOM Nancy*, France, valedictorian.

Major: Telecommunication, Network, and Security

- Master thesis: German Federal Office for Information Security (BSI), Germany Automated clustering of JS samples for the detection of malware contained in obfuscated code
- Industrial project: French Ministry of Defense, France Implemented an Xposed module to monitor Android devices; group of 4 persons (6 months)
- Internship: Fraunhofer IOSB, Germany Implemented a passive asset detection system (8 weeks)
- 2012–2014 Preparation for the highly competitive nationwide entrance examination to the French Grandes Écoles, France.

Major: Mathematics, Physics, and Computer Science

2012 **High school graduation**, France, graduated with distinction ("mention très bien"), European section.

Major: Mathematics, Physics & Chemistry, Biology, and German

#### Awards and Honors

2022 PC members – Honorable mentions, The Web Conf.

Last update: October 25, 2022

- 2021 **Inspiring Career**, 1 of 3 invited alumni (out of 2,300 alumni) for the 30<sup>th</sup> anniversary of the French Grande École TELECOM Nancy, Remote.
- 2019–2022 **Program of Excellence**, Saarland University, Germany.
  - 2017 Valedictorian, French Grande École TELECOM Nancy, France.
  - 2016 Best Student Recognition Event, IBM, UK.

#### **Publications**

Kimberly Ruth, **Aurore Fass**, Jonathan J. Azose, Mark Pearson, Emma Thomas, Caitlin Sadowski, and Zakir Durumeric. A World Wide View of Browsing the World Wide Web. In *ACM Internet Measurement Conference (IMC)*, 2022.

Aurore Fass, Dolière Francis Somé, Michael Backes, and Ben Stock. DOUBLEX: Statically Detecting Vulnerable Data Flows in Browser Extensions at Scale. In ACM CCS, 2021. Code repository: https://github.com/Aurore54F/DoubleX.

Marvin Moog, Markus Demmel, Michael Backes, and **Aurore Fass**. Statically Detecting JavaScript Obfuscation and Minification Techniques in the Wild. In *Dependable Systems and Networks (DSN)*, 2021. Code repository: https://github.com/MarM15/js-transformations.

Aurore Fass, Michael Backes, and Ben Stock. HIDENOSEEK: Camouflaging Malicious JavaScript in Benign ASTs. In *ACM CCS*, 2019. Code repository: https://github.com/Aurore54F/HideNoSeek.

**Aurore Fass**, Michael Backes, and Ben Stock. JSTAP: A Static Pre-Filter for Malicious JavaScript Detection. In *ACSAC*, 2019. Code repository: https://github.com/Aurore54F/JStap.

#### Selected Talks

DoubleX: Statically Analyzing Browser Extensions at Scale

Jul 2022 Berkeley Security Seminar. Berkeley, CA, U.S.

May 2022 RuhrSec. Bochum, Germany (extended version).

Apr 2022 Stanford Computer Forum – Security Workshop. Stanford, CA, U.S.

Nov 2021 Stanford Security Lunch. Stanford, CA, U.S.

Last update: October 25, 2022

Mar 2022 Jun 2021	Studying JavaScript Security Through Static Analysis Palo Alto Networks (CA, U.S.). Remote (extended version). Spirals Webinar at Inria Lille (France). Remote.
Mar 2021 Dec 2020	Statically Analyzing Malicious JavaScript in the Wild Webinar at LORIA (France). Remote. BINSEC Webinar at CEA (France). Remote.
May 2020 Mar 2019 Feb 2019	HideNoSeek: Camouflaging Malicious JavaScript in Benign ASTs RuhrSec. Remote.  Grande Region Security and Reliability Day (GRSRD). Nancy, France.  MADWeb. San Diego, CA, U.S.
Nov 2018 Jun 2018 Mar 2018	JaSt: Fully Syntactic Detection of Malicious (Obfuscated) JavaScript Blackhoodie. Berlin, Germany.  Malware Meeting at LORIA. Nancy, France.  Grande Region Security and Reliability Day (GRSRD). Saarbrücken, Germany.
	Publicly Available Software
DoubleX	Static browser extension analyzer: detection of suspicious external data flows
HIDENOSEEK	Static analyzer to detect syntactic clones in JavaScript inputs
JSTAP	Static and modular malicious JavaScript detector
JaSt	Static malicious JavaScript detector
	Teaching
WS 2020–2021	<ul> <li>Temporary Lecturer at TELECOM Nancy (Université de Lorraine, France)</li> <li>Browser Extensions: Architecture and Security Consideration (lectures and practicals for MSc students)</li> </ul>
WS 2019–2020	<ul> <li>Seminar: Joint Advances in Web Security</li> <li>• Browser Extensions: Security and Vulnerabilities</li> <li>• Overview of Malicious JavaScript Detection Techniques and Attacks</li> </ul>
WS 2018–2019	<ul> <li>Seminar: Joint Advances in Web Security</li> <li>Overview of Malicious JavaScript Detection Techniques</li> <li>Cryptojacking: Definition, Detection, and Dimensions</li> </ul>
	Student Advising and Mentoring Ph.D. Student Collaboration, Mentoring & Supervision
Winter 2022–	Liz Izhikevich – Internet Scanning, with Zakir Durumeric, Stanford University
Fall 2021–	Kimberly Ruth – Browsing Behavior, with Zakir Durumeric, Stanford University
Fall 2021-	Shubham Agarwal – Browser Extension Security, CISPA
	Master Student Mentoring & Supervision

Last update: October 25, 2022

Fall 2022<br/>– Manda Tran – Browser Extension Security, Stanford University

#### Bachelor Student Mentoring & Supervision

Spring 2022– **Sheryl Hsu** – *Browser Extension Security*, Stanford University Alumni

- 2022 Mark Tran (BSc student) Browser Extension Fingerprinting
   Vrushank Gunjur (BSc student) Over-Privileged Extensions
   Nahum Maru (BSc student) Browser Extension Crawler
   Fengchen Gong (MSc student) Browser Fingerprinting
- 2021 Liana Patel (Ph.D. student) Web Crawler, with Zakir Durumeric
   Luca Pistor & Nathan Bhak (BSc students) Exam Software Security
   Paul Szymanski (BSc thesis) A Study of State-of-the-Art Call Graph Creation Approaches for JavaScript, with Cristian-Alexandru Staicu
- 2020 Anne Christin Deutschen & Luc Seyler (BSc students) Browser Extension Vulnerability, with Dolière Francis Somé
- 2019–2020 Marvin Moog & Markus Demmel (BSc students) Analysis of JavaScript Obfuscation Techniques
  - 2019 **Maximilian Zöllner** & **Niklas Kempf** (BSc students) *Intelligent Fuzzing System for JavaScript*
  - 2018 Nils Glörfeld (BSc student) Malicious JavaScript Deobfuscation Dennis Salzmann (BSc student) – Malicious JavaScript Detection

## Additional Skills – Languages

French Mother tongue

English Trilingual proficiency TOEIC score: 910 (2014); living in the U.S. since 2021

German Trilingual proficiency C1 Certificate (2016); lived in Germany 2017–2021
