# Dr.-Ing. Aurore Fass

Tenure-Track Faculty at CISPA

## Research Overview

My research work revolves around designing practical approaches to protect the security and privacy of Web users. I build systems to proactively detect malicious JavaScript code and suspicious browser extensions. I analyze data to understand how people spend time on the Web, and I want to use the resulting perspective to prioritize defense strategies.

## Scientific Career

- 2023- **Tenure-Track Faculty**, CISPA Helmholtz Center for Information Security, Germany.
- 2021–2023 Visiting Assistant Professor, Stanford University, U.S.
  - Host: Zakir Durumeric
  - 2021 **Postdoctoral Researcher**, CISPA Helmholtz Center for Information Security, Germany.
- 2017–2021 **Ph.D. Student**, Saarland University & CISPA Helmholtz Center for Information Security, Germany.
  - o Ph.D. thesis: Studying JavaScript Security Through Static Analysis
  - o Advisors: Michael Backes and Ben Stock

#### Education

2014–2017 **Grande École** (similar to a Master Degree), *TELECOM Nancy*, France, valedictorian.

Major: Telecommunication, Network, and Security

- Master thesis: German Federal Office for Information Security (BSI), Germany Automated clustering of JS samples for the detection of malware contained in obfuscated code
- Industrial project: French Ministry of Defense, France Implemented an Xposed module to monitor Android devices; group of 4 persons (6 months)
- Internship: Fraunhofer IOSB, Germany Implemented a passive asset detection system (8 weeks)
- 2012–2014 Preparation for the highly competitive nationwide entrance examination to the French Grandes Écoles, France.

Major: Mathematics, Physics, and Computer Science

2012 **High school graduation**, France, graduated with distinction ("mention très bien"), European section.

Major: Mathematics, Physics & Chemistry, Biology, and German

## Awards and Honors

- 2024 Noteworthy Reviewer Recognition, EuroS&P.
- 2023 Top Reviewer Award, ACSAC.

- 2023 Top Reviewer Award, ACM CCS.
- 2022 Top Reviewer Award, ACM CCS.
- 2022 PC Member Honorable Mention, TheWebConf.
- 2021 **Inspiring Career Recognition**, 1 of 3 invited alumni (out of 2,300 alumni) for the 30<sup>th</sup> anniversary of the French Grande École TELECOM Nancy, Remote.
- 2019–2022 **Program of Excellence**, Saarland University, Germany.
  - 2017 Valedictorian, French Grande École TELECOM Nancy, France.
  - 2016 Best Student Recognition Event, IBM, UK.

## Publications

Dominic Troppmann, Aurore Fass, and Cristian-Alexandru Staicu. Typed and Confused: Studying the Unexpected Dangers of Gradual Typing. In *IEEE/ACM International Conference on Automated Software Engineering (ASE)*, 2024. Code repository: https://zenodo.org/records/13760256.

Acceptance rate: 26% (155/587 full research papers).

Giovanni Apruzzese, Aurore Fass, and Fabio Pierazzi. When Adversarial Perturbations meet Concept Drift: an Exploratory Analysis on ML-NIDS. In *ACM AISec (CCS Workshop on Artificial Intelligence and Security)*, 2024. Code repository: https://github.com/hihey54/aisec24.

Acceptance rate: 25% (18 / 72 full research papers).

Shubham Agarwal, **Aurore Fass**, and Ben Stock. Peeking through the window: Fingerprinting Browser Extensions through Page-Visible Execution Traces and Interactions. In *ACM CCS*, 2024. Code repository: https://github.com/raider-ext/raider.

Acceptance rate: 18% (129 / 710 full research papers, Cycle A).

\* Sheryl Hsu, Manda Tran, and **Aurore Fass**. What is in the Chrome Web Store? Investigating Security-Noteworthy Browser Extensions. In *ACM AsiaCCS*, 2024. Media coverage: https://aurore54f.github.io/papers/hsu2024cws.media. Acceptance rate: 22% (65/301 full research papers).

Liz Izhikevich, Manda Tran, Michalis Kallitsis, **Aurore Fass**, and Zakir Durumeric. Cloud Watching: Understanding Attacks Against Cloud-Hosted Services. In *ACM Internet Measurement Conference (IMC)*, 2023.

Acceptance rate: 25% (52 / 208 full research papers).

- \* Kimberly Ruth, **Aurore Fass**, Jonathan J. Azose, Mark Pearson, Emma Thomas, Caitlin Sadowski, and Zakir Durumeric. A World Wide View of Browsing the World Wide Web. In *ACM Internet Measurement Conference (IMC)*, 2022. Acceptance rate: 26% (56 / 212 full research papers).
- \* Aurore Fass, Dolière Francis Somé, Michael Backes, and Ben Stock. DOUBLEX: Statically Detecting Vulnerable Data Flows in Browser Extensions at Scale. In ACM CCS, 2021. Code repository: https://github.com/Aurore54F/DoubleX. Acceptance rate: 23% (131/564 full research papers, May cycle).

Marvin Moog, Markus Demmel, Michael Backes, and **Aurore Fass**. Statically Detecting JavaScript Obfuscation and Minification Techniques in the Wild. In *IEEE/IFIP Dependable Systems and Networks (DSN)*, 2021. Code repository:

Last update: October 30, 2024

https://github.com/MarM15/js-transformations.

Acceptance rate: 16% (48/295 full research papers).

\* Aurore Fass, Michael Backes, and Ben Stock. HIDENOSEEK: Camouflaging Malicious JavaScript in Benign ASTs. In *ACM CCS*, 2019. Code repository: https://github.com/Aurore54F/HideNoSeek.

Acceptance rate: 14% (32 / 225 full research papers, February cycle).

Aurore Fass, Michael Backes, and Ben Stock. JSTAP: A Static Pre-Filter for Malicious JavaScript Detection. In *ACSAC*, 2019. Code repository: https://github.com/Aurore54F/JStap.

Acceptance rate: 23% (60 / 266 full research papers).

Aurore Fass, Robert P. Krawczyk, Michael Backes, and Ben Stock. JAST: Fully Syntactic Detection of Malicious (Obfuscated) JavaScript. In *DIMVA*, 2018. Code repository: https://github.com/Aurore54F/JaSt.

Acceptance rate: 32% (18/56 full research papers).

The publications are listed in reverse-chronological order. I marked the four most important ones with an \*.

## Community Services

Organizing Role USENIX Security Artifact Evaluation Committee Co-Chair 2025, ACM CCS Workshop

General Co-Chair 2024, Associate Editor of the ACM Transactions on Security and Privacy (TOPS) 2024, MADWeb (workshop co-located with NDSS) 2024 & 2023 PC Co-Chair and MADWeb 2025– Steering Committee

PC Member USENIX Security 2025 & 2024, ACM CCS 2025–2021, IEEE EuroS&P 2024 & 2023, ACSAC 2024 & 2023, IEEE S&P 2023, TheWebConf 2023 & 2022, ARES 2023 & 2022, SecWeb 2024–2021

**Doctoral** Romain Fouquet (Ph.D., Computer Science, Université de Lille, May 2023) **Committee** 

Project Proposal Reviewed projects for several European funding organizations (2023)

Artifact USENIX Security 2021, ACSAC 2018 Committee

External IEEE S&P 2024, TWEB 2024, ESORICS 2023, ICCCN 2023, NDSS 2022–2020, USENIX Security Reviewer 2022–2020, IEEE EuroS&P 2019, ACSAC 2019 & 2018, ACM CCS 2018

## Teaching

WS 2024-2025 The Web Security Seminar

SS 2024 The Web Security Seminar

WS 2023-2024 The Web Security Seminar

- Malicious JavaScript Analysis
- o Beyond Malicious Extensions: How can Extensions put User Security & Privacy at Risk?
- User Browsing Behavior vs. Top Lists

WS 2020–2021 Lecturer at TELECOM Nancy (Université de Lorraine, France)

• Browser Extensions: Architecture and Security Consideration (lectures and practicals for MSc students)

WS 2019-2020 Seminar: Joint Advances in Web Security

- Browser Extensions: Security and Vulnerabilities
- o Overview of Malicious JavaScript Detection Techniques and Attacks

WS 2018-2019 Seminar: Joint Advances in Web Security

- o Overview of Malicious JavaScript Detection Techniques
- o Cryptojacking: Definition, Detection, and Dimensions

# Advising and Mentoring

## Ph.D. Students

- Apr 2024− Valentino Dalla Valle Browser Extension Security → paper under submission, Saarland University & CISPA
- Dec 2023 **Dominic Troppmann** Type Checks  $\rightarrow$  ASE 2024, co-supervised with Cristian-Alexandru Staicu, Saarland University & CISPA

#### Research Assistant

- Dec 2024 Laith Alhelwane (MSc student) JavaScript or Browser Extension Security, Saarland University

  Alumni
- 2023–2024 Ben Rosenzweig (BSc thesis) Machine Learning-Based Approach for Detecting Malicious Browser Extensions  $\rightarrow$  paper under submission, Saarland University
- 2022–2023 Sheryl Hsu (BSc student) Browser Extension Security → AsiaCCS 2024, Stanford University Manda Tran (MSc student → Ph.D. student UCLA) Browser Extension Security → AsiaCCS 2024, Stanford University

  Liz Izhikevich (Ph.D. student of Zakir Durumeric → Assistant Professor UCLA) Internet Scanning → IMC 2023, Stanford University
- 2021–2023 Shubham Agarwal (Ph.D. student of Ben Stock) Browser Extension Security → CCS 2024, Saarland University & CISPA
   Kimberly Ruth (Ph.D. student of Zakir Durumeric) Web Browsing Behavior → IMC 2022 +
  - Mark Tran (BSc student) Browser Extension Fingerprinting, Stanford University
     Vrushank Gunjur (BSc student) Over-Privileged Extensions, Stanford University
     Nahum Maru (BSc student) Browser Extension Crawler, Stanford University
     Fengchen (Maggie) Gong (MSc student → Ph.D. student Princeton) Fingerprinting, Stanford University
  - 2021 Liana Patel (Ph.D. student of Zakir Durumeric) Crawler, Stanford University
     Luca Pistor & Nathan Bhak (BSc students) Exam Software Security, Stanford University
     Paul Szymanski (BSc thesis) A Study of State-of-the-Art Call Graph Creation Approaches for JavaScript, with Cristian-Alexandru Staicu, Saarland University & CISPA
  - 2020 Anne Christin Deutschen & Luc Seyler (BSc students) Browser Extension Vulnerability, with Dolière Francis Somé, Saarland University & CISPA
- 2019–2020 Marvin Moog & Markus Demmel (BSc students) Analysis of JavaScript Obfuscation Techniques  $\rightarrow$  DSN 2021, Saarland University & CISPA
  - 2019 Maximilian Zöllner & Niklas Kempf (BSc students) Intelligent Fuzzing System for JavaScript, Saarland University & CISPA
  - 2018 Nils Glörfeld (BSc student) Malicious JavaScript Deobfuscation, Saarland University & CISPA Dennis Salzmann (BSc student) – Malicious JavaScript Detection, Saarland University & CISPA

### Invited Talks

## Dos and Don'ts of Reviewing

paper under submission, Stanford University

- Nov 2024 Keynote at the Winter School, WinterHack 2024. Bochum, Germany.
  - Browser Extension (In)Security
- Jun 2024 GDR Information Security. Rennes, France.
- Doublex: Statically Detecting Vulnerable Data Flows in Browser Extensions
- Nov 2023 Workshop at INRIA. Paris, France.

- Jul 2022 Berkeley Security Seminar. Berkeley, CA, U.S.
- May 2022 RuhrSec. Bochum, Germany (extended version).
- Apr 2022 Stanford Computer Forum Security Workshop. Stanford, CA, U.S.
- Nov 2021 Stanford Security Lunch. Stanford, CA, U.S.

## Studying JavaScript Security Through Static Analysis

- Apr 2024 PEPR Cyber Project DefMal Webinar (France). Remote (extended version).
- Mar 2022 Palo Alto Networks (CA, U.S.). Remote (extended version).
- Jun 2021 Spirals Webinar at Inria Lille (France). Remote.

## Statically Analyzing Malicious JavaScript in the Wild

- Mar 2021 Webinar at LORIA (France). Remote.
- Dec 2020 BINSEC Webinar at CEA (France). Remote.

## HIDENOSEEK: Camouflaging Malicious JavaScript in Benign ASTs

- May 2020 RuhrSec (Germany). Remote (extended version).
- Mar 2019 Grande Region Security and Reliability Day (GRSRD). Nancy, France.
- Feb 2019 MADWeb. San Diego, CA, U.S.

## JAST: Fully Syntactic Detection of Malicious (Obfuscated) JavaScript

- Nov 2018 Blackhoodie. Berlin, Germany.
- Jun 2018 Malware Meeting at LORIA. Nancy, France.
- Mar 2018 Grande Region Security and Reliability Day (GRSRD). Saarbrücken, Germany.

## Publicly Available Software

All the software I developed is publicly available on my GitHub account:

- static-pdg-js Static analysis of JavaScript code (AST, control & data flows, pointer analysis)
  - Doublex Static browser extension analyzer: detection of suspicious external data flows
- HideNoSeek Static analyzer to detect syntactic clones in JavaScript inputs
  - JSTAP Static and modular malicious JavaScript detector
  - JAST Static malicious JavaScript detector
  - reimpl-cujo Reimplementation of Cujo, static malicious JavaScript detector
- reimpl-zozzle Reimplementation of Zozzle, static malicious JavaScript detector

# Additional Skills – Languages

- French Mother tongue
- English Trilingual proficiency TOEIC score: 910 (2014); lived in the U.S. 2021–2023
- German Trilingual proficiency C1 Certificate (2016); lived in Germany 2017–2021 & 2023 onwards

Last update: October 30, 2024 5 /5
