Dr.-Ing. Aurore Fass

Tenure-Track Faculty at CISPA

✉ fass@cispa.de
aurore54f.github.io

Research Overview

My research work revolves around designing practical approaches to protect the security and privacy of Web users. I build systems to proactively detect malicious JavaScript code and suspicious browser extensions. I analyze data to understand how people spend time on the Web, and I want to use the resulting perspective to prioritize defense strategies.

Scientific Career

2023– **Tenure-Track Faculty**, *CISPA Helmholtz Center for Information Security*, Germany.

2021–2023 **Visiting Assistant Professor**, *Stanford University*, U.S.
- Host: Zakir Durumeric

2021 **Postdoctoral Researcher**, *CISPA Helmholtz Center for Information Security*, Germany.

2017–2021 **Ph.D. Student**, *Saarland University & CISPA Helmholtz Center for Information Security*, Germany.
- Ph.D. thesis: *Studying JavaScript Security Through Static Analysis*
- Advisors: Michael Backes and Ben Stock

Education

2014–2017 **Grande École** (similar to a Master Degree), *TELECOM Nancy*, France, **valedictorian**.

Major: Telecommunication, Network, and Security

- Master thesis: German Federal Office for Information Security (BSI), Germany
  Automated clustering of JS samples for the detection of malware contained in obfuscated code
- Industrial project: French Ministry of Defense, France
  Implemented an Xposed module to monitor Android devices; group of 4 persons (6 months)
- Internship: Fraunhofer IOSB, Germany
  Implemented a passive asset detection system (8 weeks)

2012–2014 **Preparation for the highly competitive nationwide entrance examination to the French Grandes Écoles**, France.

Major: Mathematics, Physics, and Computer Science

2012 **High school graduation**, France, graduated with distinction ("mention très bien"), European section.

Major: Mathematics, Physics & Chemistry, Biology, and German

Awards and Honors

2025 **Distinguished Reviewer Award**, *USENIX Security*.

2024 **Distinguished Reviewer Award**, *ACSAC*.

2024 **Noteworthy Reviewer Recognition**, *EuroS&P.*

2023 **Top Reviewer Award**, *ACSAC.*

2023 **Top Reviewer Award**, *ACM CCS.*

2022 **Best Reviewer Award**, *ACM CCS.*

2022 **PC Member Honorable Mention**, *TheWebConf.*

2021 **Inspiring Career Recognition**, *1 of 3 invited alumni (out of 2,300 alumni) for the 30th anniversary of the French Grande École TELECOM Nancy*, Remote.

2019–2022 **Program of Excellence**, *Saarland University*, Germany.

2017 **Valedictorian**, *French Grande École TELECOM Nancy*, France.

2016 **Best Student Recognition Event**, *IBM*, UK.

Publications

Kimberly Ruth, Veronica Rivera, Gautam Akiwate, **Aurore Fass**, Kurt Thomas Patrick Gage Kelley, and Zakir Durumeric. 'Perfect is the Enemy of Good': The CISO's Role in Enterprise Security as a Business Enabler. In *ACM CHI*, 2025.

* Saskia Laura Schröer, Giovanni Apruzzese, Soheil Human, Pavel Laskov, Hyrum S. Anderson, Edward W.N. Bernroider, **Aurore Fass**, Ben Nassi, Vera Rimmer, Fabio Roli, Samer Salam, Ashley Shen, Ali Sunyaev, Isabel Wagner, Gang Wang, and Tim Wadhwa-Brown. SoK: On the Offensive Potential of AI. In *IEEE Secure and Trustworthy Machine Learning Conference (SaTML)*, 2025.
Acceptance rate: 29.4% (53 / 180 full research papers).

Dominic Troppmann, **Aurore Fass**, and Cristian-Alexandru Staicu. Typed and Confused: Studying the Unexpected Dangers of Gradual Typing. In *IEEE/ACM International Conference on Automated Software Engineering (ASE)*, 2024. Code repository: `https://zenodo.org/records/13760256`.
Acceptance rate: 26% (155 / 587 full research papers).

Giovanni Apruzzese, **Aurore Fass**, and Fabio Pierazzi. When Adversarial Perturbations meet Concept Drift: an Exploratory Analysis on ML-NIDS. In *ACM AISec (CCS Workshop on Artificial Intelligence and Security)*, 2024. Code repository: `https://github.com/hihey54/aisec24`.
Acceptance rate: 25% (18 / 72 full research papers).

Shubham Agarwal, **Aurore Fass**, and Ben Stock. Peeking through the window: Fingerprinting Browser Extensions through Page-Visible Execution Traces and Interactions. In *ACM CCS*, 2024. Code repository: `https://github.com/raider-ext/raider`.
Acceptance rate: 18% (129 / 710 full research papers, Cycle A).

* Sheryl Hsu, Manda Tran, and **Aurore Fass**. What is in the Chrome Web Store? Investigating Security-Noteworthy Browser Extensions. In *ACM AsiaCCS*, 2024. Media coverage: `https://aurore54f.github.io/papers/hsu2024cws.media`.
Acceptance rate: 22% (65 / 301 full research papers).

Liz Izhikevich, Manda Tran, Michalis Kallitsis, **Aurore Fass**, and Zakir Durumeric. Cloud Watching: Understanding Attacks Against Cloud-Hosted Services. In *ACM Internet Measurement Conference (IMC)*, 2023.
Acceptance rate: 25% (52 / 208 full research papers).

* Kimberly Ruth, **Aurore Fass**, Jonathan J. Azose, Mark Pearson, Emma Thomas, Caitlin Sadowski, and Zakir Durumeric. A World Wide View of Browsing the World Wide Web. In *ACM Internet Measurement Conference (IMC)*, 2022.
Acceptance rate: 26% (56 / 212 full research papers).

* **Aurore Fass**, Dolière Francis Somé, Michael Backes, and Ben Stock. DoubleX: Statically Detecting Vulnerable Data Flows in Browser Extensions at Scale. In *ACM CCS*, 2021. Code repository: `https://github.com/Aurore54F/DoubleX`.
Acceptance rate: 23% (131 / 564 full research papers, May cycle).

Marvin Moog, Markus Demmel, Michael Backes, and **Aurore Fass**. Statically Detecting JavaScript Obfuscation and Minification Techniques in the Wild. In *IEEE/IFIP Dependable Systems and Networks (DSN)*, 2021. Code repository: `https://github.com/MarM15/js-transformations`.
Acceptance rate: 16% (48 / 295 full research papers).

* **Aurore Fass**, Michael Backes, and Ben Stock. HideNoSeek: Camouflaging Malicious JavaScript in Benign ASTs. In *ACM CCS*, 2019. Code repository: `https://github.com/Aurore54F/HideNoSeek`.
Acceptance rate: 14% (32 / 225 full research papers, February cycle).

Aurore Fass, Michael Backes, and Ben Stock. JStap: A Static Pre-Filter for Malicious JavaScript Detection. In *ACSAC*, 2019. Code repository: `https://github.com/Aurore54F/JStap`.
Acceptance rate: 23% (60 / 266 full research papers).

Aurore Fass, Robert P. Krawczyk, Michael Backes, and Ben Stock. JaSt: Fully Syntactic Detection of Malicious (Obfuscated) JavaScript. In *DIMVA*, 2018. Code repository: `https://github.com/Aurore54F/JaSt`.
Acceptance rate: 32% (18 / 56 full research papers).

The publications are listed in reverse-chronological order. I marked the five most important ones with an *.

Community Services

Organizing Role	USENIX Security **Artifact Evaluation Committee Co-Chair** 2026 & 2025, **Associate Editor** of the ACM Transactions on Security and Privacy (TOPS) 2024 & 2025, ACM CCS **Workshop General Co-Chair** 2024, MADWeb (workshop co-located with NDSS) 2024 & 2023 **PC Co-Chair** and MADWeb 2025– **Steering Committee**
PC Member	ACM CCS 2026–2021, USENIX Security 2025 & 2024, ACSAC 2025–2023, IEEE EuroS&P 2024 & 2023, IEEE S&P 2023, TheWebConf 2023 & 2022, ARES 2023 & 2022, SecWeb 2024–2021
Doctoral Committee	Jean Luc Intumwayase (Ph.D., Computer Science, Université de Lille, December 2024) Romain Fouquet (Ph.D., Computer Science, Université de Lille, May 2023)
Project Proposal	Reviewed projects for several European funding organizations (2023)
Artifact Committee	USENIX Security 2021, ACSAC 2018
External Reviewer	IEEE S&P 2024, TWEB 2024, ESORICS 2023, ICCCN 2023, NDSS 2022–2020, USENIX Security 2022–2020, IEEE EuroS&P 2019, ACSAC 2019 & 2018, ACM CCS 2018
Misc	IMC Travel Grants 2023, CISPA Faculty Hiring Committee 2021

Teaching

SS 2025	**The Web Security Seminar**
WS 2024–2025	**Guest Lectures** on Web Security & Security of Browser Extensions: ○ **University of Bologna** ○ **University of Modena and Reggio Emilia**

WS 2024–2025	**The Web Security Seminar**
SS 2024	**The Web Security Seminar**
WS 2023–2024	**The Web Security Seminar**
	○ Malicious JavaScript Analysis
	○ Beyond Malicious Extensions: How can Extensions put User Security & Privacy at Risk?
	○ User Browsing Behavior vs. Top Lists
WS 2020–2021	**Lecturer at TELECOM Nancy** (Université de Lorraine, France)
	○ Browser Extensions: Architecture and Security Consideration (lectures and practicals for MSc students)
WS 2019–2020	**Seminar: Joint Advances in Web Security**
	○ Browser Extensions: Security and Vulnerabilities
	○ Overview of Malicious JavaScript Detection Techniques and Attacks
WS 2018–2019	**Seminar: Joint Advances in Web Security**
	○ Overview of Malicious JavaScript Detection Techniques
	○ Cryptojacking: Definition, Detection, and Dimensions

Advising and Mentoring

Ph.D. Students

Apr 2025–	**Huda Dawoud** – *Browser Extension Analysis*, CISPA
Apr 2024–	**Valentino Dalla Valle** – *Browser Extension Security → paper under submission*, Saarland University & CISPA
Dec 2023–	**Dominic Troppmann** – *Type Checks → ASE 2024*, co-supervised with Cristian-Alexandru Staicu, Saarland University & CISPA

Research Assistant

Mar 2025–	**Abdullah Hassan Chaudhry** (MSc student) – *Browser Extension Security*, Saarland University
Dec 2024–	**Laith Alhelwane** (MSc student) – *Browser Extension Security*, Saarland University

Alumni

2023–2024	**Ben Rosenzweig** (BSc thesis) – *Machine Learning-Based Approach for Detecting Malicious Browser Extensions → paper under submission*, Saarland University
2022–2023	**Sheryl Hsu** (BSc student → Research Engineer OpenAI) – *Browser Extension Security → AsiaCCS 2024*, Stanford University
	Manda Tran (MSc student → Ph.D. student UCLA) – *Browser Extension Security → AsiaCCS 2024*, Stanford University
	Liz Izhikevich (Ph.D. student of Zakir Durumeric → Assistant Professor UCLA) – *Internet Scanning → IMC 2023*, Stanford University
2021–2023	**Shubham Agarwal** (Ph.D. student of Ben Stock → PostDoc MPI-SP) – *Browser Extension Security → CCS 2024*, Saarland University & CISPA
	Kimberly Ruth (Ph.D. student of Zakir Durumeric) – *Web Browsing Behavior → IMC 2022 + paper under submission*, Stanford University
2022	**Mark Tran** (BSc student) – *Browser Extension Fingerprinting*, Stanford University
	Vrushank Gunjur (BSc student) – *Over-Privileged Extensions*, Stanford University
	Nahum Maru (BSc student) – *Browser Extension Crawler*, Stanford University
	Fengchen (Maggie) Gong (MSc student → Ph.D. student Princeton) – *Fingerprinting*, Stanford University
2021	**Liana Patel** (Ph.D. student of Zakir Durumeric) – *Crawler*, Stanford University
	Luca Pistor & **Nathan Bhak** (BSc students) – *Exam Software Security*, Stanford University

Paul Szymanski (BSc thesis) – *A Study of State-of-the-Art Call Graph Creation Approaches for JavaScript*, with Cristian-Alexandru Staicu, Saarland University & CISPA

2020   **Anne Christin Deutschen** & **Luc Seyler** (BSc students) – *Browser Extension Vulnerability*, with Dolière Francis Somé, Saarland University & CISPA

2019–2020   **Marvin Moog** & **Markus Demmel** (BSc students) – *Analysis of JavaScript Obfuscation Techniques* → [DSN 2021](), Saarland University & CISPA

2019   **Maximilian Zöllner** & **Niklas Kempf** (BSc students) – *Intelligent Fuzzing System for JavaScript*, Saarland University & CISPA

2018   **Nils Glörfeld** (BSc student) – *Malicious JavaScript Deobfuscation*, Saarland University & CISPA
     Dennis Salzmann (BSc student) – *Malicious JavaScript Detection*, Saarland University & CISPA

Invited Talks

Dos and Don'ts of Reviewing
Nov 2024   Keynote at the Winter School, WinterHack 2024. Bochum, Germany.

Browser Extension (In)Security
Jan 2025   Seminar at Inria Sophia Antipolis. Sophia Antipolis, France.
Dec 2024   Seminar at Inria Lille. Lille, France.
Jun 2024   GDR Information Security. Rennes, France.

DoubleX: Statically Detecting Vulnerable Data Flows in Browser Extensions
Nov 2023   Workshop at Inria. Paris, France.
Jul 2022   Berkeley Security Seminar. Berkeley, CA, U.S.
May 2022   RuhrSec. Bochum, Germany (extended version).
Apr 2022   Stanford Computer Forum – Security Workshop. Stanford, CA, U.S.
Nov 2021   Stanford Security Lunch. Stanford, CA, U.S.

Studying JavaScript Security Through Static Analysis
Apr 2024   PEPR Cyber – Project DefMal Webinar (France). Remote (extended version).
Mar 2022   Palo Alto Networks (CA, U.S.). Remote (extended version).
Jun 2021   Webinar at Inria Lille (France). Remote.

Statically Analyzing Malicious JavaScript in the Wild
Mar 2021   Webinar at LORIA (France). Remote.
Dec 2020   BINSEC Webinar at CEA (France). Remote.

HideNoSeek: Camouflaging Malicious JavaScript in Benign ASTs
May 2020   RuhrSec (Germany). Remote (extended version).
Mar 2019   Grande Region Security and Reliability Day (GRSRD). Nancy, France.
Feb 2019   MADWeb. San Diego, CA, U.S.

JaSt: Fully Syntactic Detection of Malicious (Obfuscated) JavaScript
Nov 2018   Blackhoodie. Berlin, Germany.
Jun 2018   Malware Meeting at LORIA. Nancy, France.
Mar 2018   Grande Region Security and Reliability Day (GRSRD). Saarbrücken, Germany.

Publicly Available Software

All the software I developed is publicly available on my GitHub account:

static-pdg-js	Static analysis of JavaScript code (AST, control & data flows, pointer analysis)
DoubleX	Static browser extension analyzer: detection of suspicious external data flows
HideNoSeek	Static analyzer to detect syntactic clones in JavaScript inputs
JStap	Static and modular malicious JavaScript detector

JaSt	Static malicious JavaScript detector	
reimpl-cujo	Reimplementation of Cujo, static malicious JavaScript detector	
reimpl-zozzle	Reimplementation of Zozzle, static malicious JavaScript detector	

Additional Skills – Languages

French	Mother tongue	
English	Trilingual proficiency	*TOEIC score: 910 (2014); lived in the U.S. 2021–2023*
German	Trilingual proficiency	*C1 Certificate (2016); lived in Germany 2017–2021 & 2023 onwards*
